The first embryos from the EmbryoProgram produced using Germany's number 1 homozygous polled bull: Koepon Duett PP Red!

The young Dressman P Red son, Duett PP Red, made his breakthrough in August with +162 gRZG and 357 gNVI. This made this impressive bull the number 2 Red & White genomic bull and the number 1 PP Red & White bull in Germany. Furthermore, he excels in conformation (124 gRZE), longevity (134 gRZN), and fertility (121 gRZR). With 1,846 kg of milk and positive figures for both fat and protein, he offers excellent milk production potential. He also transmits desirable traits for stature (105), dairyness, and breeds longer teats.

This combination with donor **3STAR Range 5450 RDC** unites two of Koepon's strongest current cow families (Discovery x Red Range). This Red-carrier Argentum daughter—from the impressive lineage of Dropbox x VG-87 Perfect x VG-88 Mark RDC—brings an all-round genomic profile featuring 378 gNVI, 3029 gTPI, and 145 gRZG. Her granddam is Koepon Perfect Range 113 RDC VG-87, the dam of the bull Rufus (at Swissgenetics).

Range 5450 RDC's strengths are a tremendous milk production potential, exceptional longevity, and top-tier health scores across all systems!

Share in the success and breed a new polled generation with us from the highly productive Lakeside Ups Red Range/Golden-Oaks Mark Prudence family!

The embryos are stored in Netherlands. These embryos sell with a GenHotel bullcontract.
