All heifers at this auction are guaranteed free of IBR and BVD. Extra veterinarian tests can take place at buyer's costs. If the animal is tested positive, the transaction can be cancelled. The recipient dams of the sale animals are vaccinated for IBR and BVD, so some lots may have antibodies for vaccin (IBR gB) due to colostrum. These antibodies will disappear in time. For export to for example Germany and Belgium sale animals need to be free of IBR gB. These sale animals will stay at the farm at costs of the seller until they are free of IBR gB. Then they will go in quarantine. Some heifers have ringworm at the moment. They can also stay at the Koepon farm at the costs of the seller, until they are free of ringworms. The milking heifers and cows are vaccinated against IBR and can only be sold into The Netherlands.

8. How is the transport arranged from the seller to the buyer?

The buyer has to arrange the transport of the purchased animal. The transport or a possible export can also be arranged by the organization. The costs (extra health-tests + certification + transport) will be entirely for the buyer.
